

# Raj Diwate

Full Stack Developer

**Address** Pune, MH, 411057

**Phone** 9325682482

**E-mail** rajdiwate786@gmail.com

Dear Hiring Manager,

I am writing to express my enthusiasm for the Full Stack Developer position at your organization, as advertised on Job Portal. With hands-on experience across frontend and backend technologies, along with a strong foundation in web development, I am confident in my ability to contribute effectively to your team.

In my role as a Full Stack Developer at DigitalFlake, I developed an Admin Dashboard using React.js for the user interface, Express.js for API management, and Mongoose ODM for data storage. I implemented JWT-based authentication with role-based access and streamlined file uploads via Multer and Cloudinary, significantly enhancing application security and data handling.

My internship as a Web Developer at TXON allowed me to gain experience building responsive layouts with Tailwind CSS and creating core UI features using React.js and Redux. This role honed my skills in creating user-friendly, optimized applications, with a focus on developing seamless, state-managed interfaces that deliver a smooth experience across devices.

At Internpe, where I worked as a Python Developer Intern, I developed a notes application using Django and Django Rest Framework. I created RESTful APIs to support CRUD operations and facilitate efficient frontend-backend interactions. This experience reinforced my understanding of backend data structures, while emphasizing robust, scalable code practices.

I am highly motivated to bring my expertise in full-stack development, API design, and responsive UI implementation to your team. Thank you for considering my application, and I look forward to discussing how my background aligns with your organization's goals.

Sincerely,  
Raj Diwate
